

The following list was captured from our meeting a couple weeks ago (1/21). The priority decisions need to be made.

1. Sample locations – EPA and others
2. Water Quality Data – by organization : EPA Scribe files are relatively straight forward, not so with other orgs.
3. Adit locations and flows – historic to present
4. Clean up sites – historic work (ARSG/319, Sunnyside, BLM)
5. Loading Data: locations, dates, orgs
6. GW Monitoring Wells and data – Sunnyside and State ?
7. Waste pile / tailings locations and data – DRMS, BLM, ARSG
8. DRMS/DMG – Consent Decree data – monitoring data (it may be Sunnyside reporting)
9. Mine sites, facilities, etc – USGS file on CD from Paper 1651
10. Potential Repository locations – future data (TBD)
11. Sunnyside data – Consent Decree reported and/or other ?
12. Precipitation and Flow – various approaches to presenting this information exist – so TBD
